

**NAME:**

Feynman Innovations Pvt. Ltd.

**LOCATION:** Mumbai, Maharashtra

**THE SOLUTION**

Construction with a robotic mobile arm and accompanying software.

**HOW IT ADDRESSES THE PROBLEM**

The technology combines various hardware (Hydraulic Boom Arm, Robotic Arm, spray nozzle etc.) and software functionalities to enable a range of construction activities, such as concrete/ cement mortar laying, brick laying, plating, tying of reinforcement, painting etc. It is a state-of-the-art technology that reduces construction wastage, enhances productivity and site safety, and can work with complex shapes while maintaining scalability and replicability.

**WHO IS THE TARGET GROUP**

The technology is suitable for builders, developers, civil engineers, and construction equipment leasing companies.

**WHAT HAS BEEN THE IMPACT SO FAR**

The technology has one patent, and is pursuing several more.
