THE SOLUTION

3D volumetric precast design and construction.

WHO IS THE TARGET GROUP

The technology is suitable for builders and developers.

HOW IT ADDRESSES THE PROBLEM

The solution focuses on incorporating the state-of-the-art 3-D volumetric precast technology to construct 15 storey building comprising 6 modular units in each floor. This technology used is unlike the conventional and 2-D Precast methods and involves production of three-dimensional modular units in controlled factory conditions. This industrial approach to building construction brings down the overall project time to as low as 30 days, along with huge cost reduction, improved efficiency and quality standards.

WHAT HAS BEEN THE IMPACT SO FAR

The solution provider has 7+ years experience in providing precast construction solutions.
